

The easy way to clone –
quick, simple, cost-effective!

The Clone Plug C4000/M4000 and Host-Guest Plug C4000 enable the quick and easy configuration of light curtains and multiple light beam safety devices

So that your machinery is available round the clock

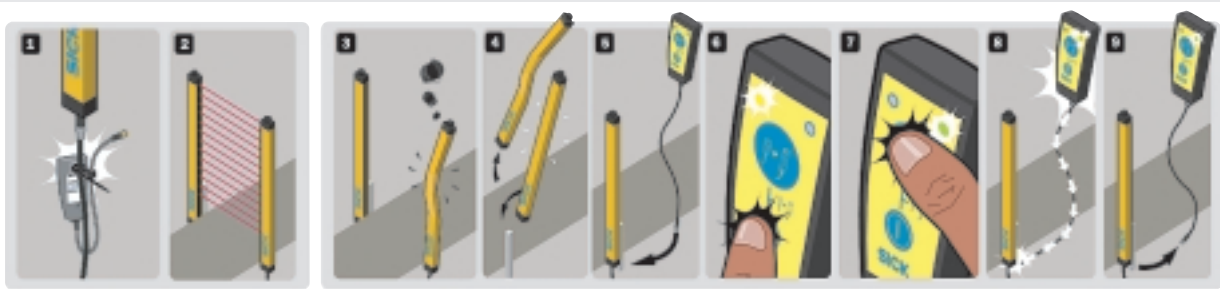

From now on, long machine downtimes are a thing of the past. You can program safety light curtains and multiple light beam safety devices in a split second using the Clone Plug C4000/M4000.

- Clone Plug C4000/M4000 stores configurations for
 - time-saving transmission to a number of identical C/M4000 light curtains or multiple light beam safety devices
 - fast and reliable uploading into C/M4000 replacement units
- Easy exchange of units – even complex configurations can be transmitted without a computer
- Only one Clone Plug necessary for sender and receiver – up to 3 cascaded units
- Combination with the UE402 enables the storage and transmission of up to 6 different operating modes
- Particularly for the automotive industry: fast resetting of system positions possible with the Host-Guest Plug

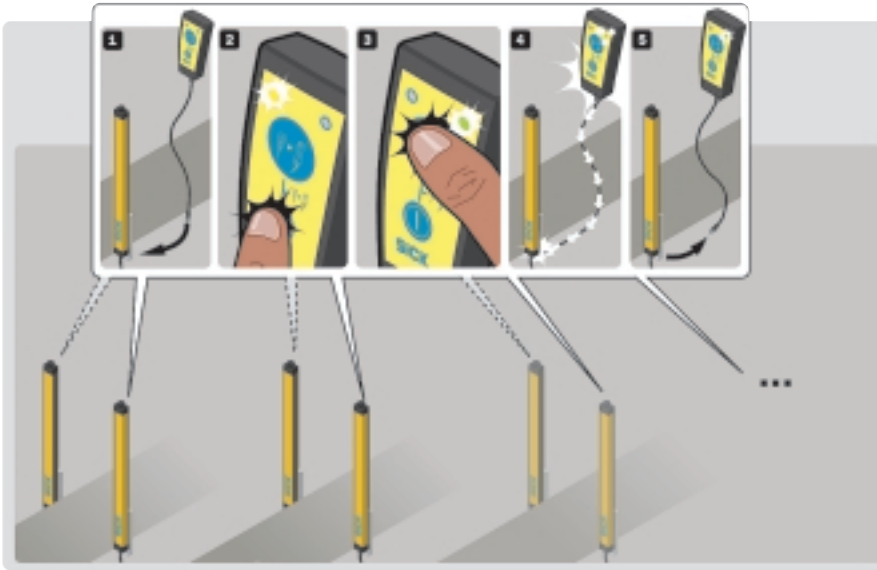

Clone Plug C4000/M4000: greater efficiency!

System and user advantages:

• **Fast replacement of a defective unit:** short downtimes, high availability

• **Simple configuration:** The software is uploaded using just 2 buttons

• **Convenient reproduction (cloning):** Multiplication of configurations for several machines

• **Universal:** One Clone Plug saves and carries your sender and receiver data

• **Practical saving:** The Clone Plug saves sender and receiver data including up to 6 operating modes

Reduce your downtimes!

No matter when and where a machine breaks down – with the Clone Plug you can put the replacement light curtain into operation in a split second. Without a computer, without a laptop.

How much does your engineer cost per hour?

Use the Clone Plug to save time and upload identical configurations into different light curtains.

You are also allowed to forget something ...

Like the marking of sensors during test installations. Resetting of system positions: independent of the light curtain, the Host-Guest Plug enables the combination or separation of optional configurations. Other configuration features are retained.
